The covid-19 outbreak. We have been stuck inside un-able to visit friends for a month and a half now. The year 2020 has had many surprises but none good. At the beginning of the year a famous basketball player name Kobe Bryant died in a helicopter crash. Next there were inside fires in Australia for a few months. Then the corona virus happened. Now there a murder hornets coming to the USA. It has been very hectic during the corona virus. It is hard to keep everyone from spreading this device, so you have to wear a face mask everywhere you go now. You can't be in groups more than 10 and you have to stay 6 feet apart at all times. Daily activity is waking up to do online school due to all schools closing and all businesses closing. But it tough kids that without school they day is pretty boring and everyone took school for granted. It is a very long day every day because for me there isn't much to do around the house and it is just me, my mom and dog.
