

My experience with Covid-19 has not been very eventful. I mostly just do school work and play video games. I play a lot of golf because the golf course just opened up. I hear a lot from the news about the virus I know its not as bad as they say. The news is wrong a lot. I've started to hang out with my friends more hopefully they don't crack down back on us. Other than that I just listen to music.
